

Version 1: Delivering change

Product-focused, platform-driven, and outcome-based: HMRC wants technology to be an accelerator, achieving big wins for taxpayers and delivering new value across the department as a whole. Over the past four years, Version 1 has helped you turn that vision into a reality - supporting critical migrations and delivering innovative solutions across CDIO.

Those shared successes, though, are just the start. We've won awards for our work together, but there's still so much more that we could achieve.

Highlights from our work with HMRC to date

Cloud Services support

Building and deploying the guardrails for HMRC customers across AWS, Azure, and Crown Hosting.

OEM RMAN

Supporting your team in post-migration case management across Microsoft Azure and AWS.

OpenAI sandbox

Creating a safe and secure environment for HMRC's innovation team to test and train AI models and algorithms.

We understand your priorities

Create world-class experiences

Harness modern, flexible technology to deliver more for colleagues and customers.

Continue to modernise

Tackle the challenges of legacy technology - reducing costs and speeding up time to value.

Capitalise on emerging tech

Embrace innovation to drive excellence and efficiency in equal measure.

Where do we come in? By helping you...

Get the job done

We don't make empty promises; we execute on budget and on time - every time. We're proud of the reputation we've built for getting things done.

Navigate complexity

From data centre migrations to DevOps and data analysis, we make modernisation simple. We're easy to work with and understand the "HMRC way".

Transform tomorrow

We know there's a need to balance immediate improvements with long term goals. That's why we believe in using quick wins to pave the way for major transformations.

Introducing AI Labs

“Our mission is to facilitate our client’s adoption of AI-related technologies to reimagine business success and drive customer satisfaction.”

Established in 2022, AI Labs has a deliberately narrow focus to help HMRC develop real-world solutions on Generative, AI, Conversational, AI, Computer Vision, and Sustainable AI - including ethics and explainability.

Powering the future of HMRC
